

FOR IMMEDIATE RELEASE

July 29th, 2015

Spring, TX – The Precinct 3 and Precinct 2 Commissioners Office will be implementing a new round of mosquito treatment throughout areas of The Woodlands this weekend. The treatment areas are identified below on the map and correspond to recent positive mosquito testing data for West Nile virus. The treatment will target areas such as culverts, storm drains and areas where mosquitos hide during the day to vehicle spraying during the evening and overnight hours. We encourage residents to take precautions by wearing repellent, eliminate standing water around your residence and avoid hours when the mosquitos are most active. For more information, please contact your Commissioner's Office below.
